Display: 1.6" large AMOLED display

Up to 13 days on a single charge

Features

Color availability may vary by country or region. Actual UX/UI may differ.

Lasts up to 13 days on a single charge. Sits lightly on your wrist, tracking over 100 workouts and daily activities, including sleep. Lets you play music, check calls and send texts right from your wrist — stay empowered, connected and effortlessly on track with Galaxy Fit3.

Battery life is up to 3.5 days with Always On Display enabled and up to 13 days with Always On Display disabled.

Battery life is based on results from internal lab tests conducted by Samsung for typical usage pattern scenarios, with Galaxy Fit3 connected to Galaxy smartphone via Bluetooth, including 52 notifications, 4 minutes of text checks, 9 minutes of time checks and 30 minutes of workouts over the course of 24 hours. It is a simulated value of the total battery consumption measured by analyzing normal usage patterns and the current required for each function with the duration of time of each function. Tested with results from a pre-release version of the device. Actual battery life may vary depending on Bluetooth connection status, configuration, settings, signal strength, presence of noise, usage and condition of the device and many other factors.

13 days on a single charge

Charge up to 13 days of power on a single charge, or quickly top it up to 65% in just 30 mins. Worry less about the battery life and focus more on your everyday fitness.

Testing for a 30-minute charge conducted by Samsung using pre-released version of Galaxy Fit3; all devices tested on fully discharged batteries with prerelease software, inbox Galaxy Fit3 USB C magnetic charging cable, and Samsung 25W USB C Power Adapter (EP-TA800). The battery charge amount varies with region, settings, usage pattern and environmental factors; actual results may vary.

Big display for big moves The large 1.6" display provides plenty of room to interact with your Galaxy Fit3. See, tap and swipe easily to do more in less time. Availability of Watchfaces may vary by country/region or device model.

Screen size is measured diagonally as a full rectangle without accounting for the rounded corners. Actual viewable area is less due to the rounded corners.

Some Watchfaces can be manually added on Galaxy Wearable app on the Bluetoothconnected Galaxy smartphone.

Over 100 workouts, ready for you

Explore over 100 different exercises to track by simply double-pressing the Home button. Forgot to press Start? Don't worry. Your Galaxy Fit3 automatically recognizes and tracks popular workouts for you, including running, elliptical, rowing machine, and now even pool swim. Galaxy Fit3 must be paired with a Samsung Galaxy smartphone with Android 10.0 or above and minimum 1.5GB Memory. Sleep tracking features are intended for general wellness and fitness purposes only. Not intended for use in detection, diagnosis, treatment of any medical condition or sleep disorder. The measurements are for your personal reference only. Please consult a medical professional for advice. Sleep Coaching requires sleep data of at least 7 days, including 2 days off. Snoring detection requires use of the mic on a Bluetooth paired Galaxy smartphone. To use the feature, the paired smartphone should be in close proximity to the user.

Your daily health and wellness Keep track of your everyday health with Galaxy Fit3, from daily activity to blood oxygen levels. See how you're doing and make healthier choice.

Your health and fitness at a glance Get a comprehensive view of your workout performance, health progress, sleep patterns and more with the Samsung Health app on your phone. Check your accumulated health data from your Galaxy Fit3 and view it over an extended period on a larger screen. Multiple functions at your fingertips

Find what you need in a snap with intuitive gestures. Swipe right for Notifications, left for Tiles, down for Quick Panel and up for App List. Want to start fresh? Just press Home button to quickly bounce back to your home screen. For quick workouts, you can double-press the home button to jump to the exercise list. Detects falls, delivers help. Your Galaxy Fit3 asks if you need help when it detects a fall using built-in sensors including a barometer. For other emergencies, you can press the Home button 5 times to notify your emergency contacts. Your pre-registered Medical info will be displayed on the lock screen when help arrives.
